Ashtray (on frame litter bin)

Article number: 10052186
Series:

Product description

A litter bin with complementary ashtray is often a good solutions against stray cigarette butts. In fact, cigarette butts are the most common type of litter. In addition, we find that cigarettes are often pressed out onto the top cover of the litter bin. This damages the material of the litter bin. Grijsen offers several solutions to integrate an ashtray into a litter bin. One possibility is to place an ashtray on the frame of the litter bin. The ashtray is designed to fit into the frame. The ashtray can be attached - without being too conspicuous - to the frame. In addition, this ashtray can be emptied separately from the waste bin when the cigarettes are burned out.

Extra information

Dimensions
Depending on bin model

Material
